

HYDRONEPHROSIS

Meaning: Hydronephrosis is a medical condition characterized by the swelling of a kidney due to the buildup of urine caused by an obstruction in the urinary tract.

1. Hydronephrosis occurs when urine backs up into the kidneys due to an obstruction.
2. Doctors diagnosed her with hydronephrosis after she complained of severe flank pain.
3. The imaging results revealed significant hydronephrosis on the left side.
4. Treatment for hydronephrosis often involves relieving the blockage to restore normal kidney function.
5. If left untreated, hydronephrosis can lead to kidney damage and potential loss of function.
