

HYDROPHOBIC

Meaning: Hydrophobic refers to a property of materials that repel water and do not allow it to spread or be absorbed.

1. Certain materials are considered hydrophobic because they repel water and prevent it from spreading.
2. The hydrophobic nature of the fabric makes it ideal for outdoor gear in wet conditions.
3. Researchers are exploring hydrophobic coatings to enhance the longevity of electronic devices.
4. When mixed with water, hydrophobic substances tend to clump together rather than dissolve.
5. Plants that thrive in arid environments often have hydrophobic surfaces to minimize water loss.
