

# HYPERCRITICISM

*Meaning: Hypercriticism is the excessive and often harsh criticism that can hinder creativity and discourage individuals from expressing their ideas or talents.*

1. Hypercriticism can often stifle creativity and discourage innovative ideas in the workplace.
2. Many artists have faced hypercriticism, leading them to question their talents and abilities.
3. The author's latest novel received hypercriticism from reviewers, who focused more on flaws than on its merits.
4. In a world driven by social media, hypercriticism has become a common challenge for public figures.
5. Hypercriticism can create an environment where individuals feel overly judged and reluctant to express themselves.
