

HYPNOTISM

Meaning: Hypnotism is a practice involving the induction of a trance-like state in individuals to influence their thoughts, behaviors, or perceptions, often used for therapeutic or entertainment purposes.

1. Hypnotism can be a powerful tool for addressing various psychological issues.
2. Many stage performers use hypnotism to entertain audiences with mind-bending illusions.
3. The practice of hypnotism has been both celebrated and criticized in the field of psychology.
4. During the session, the therapist used hypnotism to help the patient uncover repressed memories.
5. Skeptics often question the effectiveness of hypnotism, arguing that it relies on suggestion rather than genuine therapeutic change.
