

ICTEROID

Meaning: Icteroid refers to a yellowish or jaundiced appearance, typically associated with liver dysfunction or related health issues.

1. The term 'icteroid' is often used in medical literature to describe a jaundiced appearance in patients.
2. In veterinary medicine, an icteroid coloration in an animal can indicate a liver issue that requires immediate attention.
3. The doctor noted that the patient's skin had taken on an icteroid tint, suggesting a possible liver disease.
4. During the examination, the icteroid nature of the subject's sclera raised concerns about their bilirubin levels.
5. Researchers have found that certain diseases can lead to an icteroid presentation, making early diagnosis critical.
