

IMPACKMENT

Meaning: Impackment refers to the process of soil or materials becoming compacted or densely packed together, often resulting in barriers that obstruct drainage or flow.

1. The impackment of the soil after heavy rainfall created a barrier that prevented drainage.
2. Residents expressed concern over the impackment of debris in the river, which could lead to flooding.
3. The engineer noted that the impackment of materials at the construction site would delay the project.
4. To address the impackment issue, the team implemented a new drainage system to improve water flow.
5. The biologist studied the effects of impackment on local ecosystems and their ability to recover.
