

IMPACTION

Meaning: Impaction is the condition in which a mass of material, such as food or a tooth, becomes lodged and obstructs normal function, often leading to pain or discomfort.

1. Impaction in the gastrointestinal tract can lead to severe discomfort and requires immediate medical attention.
2. The dentist explained that tooth impaction often results in pain and may necessitate surgical intervention.
3. In geology, impaction refers to the process of one material being compressed and confined by another.
4. The athlete suffered from a hamstring impaction, which sidelined him for several weeks during the season.
5. Studies show that fecal impaction is a common issue in elderly patients, often resulting in hospitalization.
