

INCANDESCENCE

Meaning: Incandescence is the emission of light from a hot object, often characterized by a warm glow, as seen in sunsets or heated filaments.

1. The incandescence of the sunset painted the sky in vibrant hues of orange and pink.
2. As the filament heated up, it emitted a warm incandescence that filled the room with soft light.
3. Her eyes sparkled with a fierce incandescence, reflecting her passion for the art she created.
4. The scientists studied the incandescence produced by the heated metal to understand its properties better.
5. In the dark caverns, the glow of the luminescent minerals created an otherworldly incandescence that mesmerized the explorers.
