

INCINERABLE

Meaning: Incinerable refers to materials that can be burned safely and effectively in an incinerator for waste disposal or energy recovery.

1. Some materials are incinerable, making them suitable for waste-to-energy processes.
2. The environmental agency emphasized that incinerable waste should be separated from recyclables.
3. Due to its chemical composition, the substance was deemed incinerable and safely disposed of.
4. Incinerable items can significantly reduce landfill usage and minimize environmental impact.
5. It's essential to identify incinerable objects to ensure proper waste management practices.
