

INFRATEMPORAL

Meaning: Infratemporal refers to the anatomical region located beneath the base of the skull, particularly associated with the infratemporal fossa, which is significant in maxillofacial anatomy and surgery.

1. The infratemporal fossa is an important anatomical space located beneath the base of the skull.
2. Surgeons must have a thorough understanding of the infratemporal region to perform successful maxillofacial procedures.
3. Infratemporal neuralgia can cause significant pain that radiates from the jaw to the temple.
4. The infratemporal muscles play a crucial role in the movement of the jaw during chewing.
5. Anatomists often study the infratemporal area to better understand the relationships between various cranial structures.
