

INHABILE

Meaning: Inhable: unsuitable for living or habitation due to harsh conditions or lack of essential resources.

1. The inhospitable environment of the arctic region makes it largely uninhabitable for most species.
2. Many areas of the city were declared inhospitable due to the severe pollution and lack of basic amenities.
3. The inhable conditions in the abandoned building discouraged any attempts to renovate it.
4. Due to extreme weather patterns, certain regions of the planet are becoming increasingly inhospitable to human life.
5. Scientists are studying the inhability of other planets to determine if they could support human colonization in the future.
