

INTEGUMENT

Meaning: Integument refers to a protective outer covering or layer, such as skin or a membrane, that serves to safeguard the internal structures of an organism.

1. The integument serves as a protective barrier for the body's internal organs.
2. In many animals, the integument consists of layers that help regulate temperature and moisture.
3. Studying the integument can provide insights into evolutionary adaptations among species.
4. Certain plants have developed unique integument structures to protect their seeds from environmental threats.
5. The integumentary system, which includes skin, hair, and nails, plays a vital role in overall health.
