

INTERLUCENT

Meaning: Interlucent refers to materials or layers that allow light to pass through them while also diffusing it, creating a soft, glowing effect.

1. The artist chose interlucent materials to create a captivating play of light in her sculpture.
2. As the sun set, the interlucent layers of the clouds illuminated the sky in shades of pink and gold.
3. The interlucent nature of the glass allowed viewers to see both the artwork and the reflections of the surrounding environment.
4. In the forest, interlucent leaves created a dappled effect on the ground, blending light and shadow beautifully.
5. The fabric's interlucent quality made the dress appear almost ethereal in the soft glow of the evening light.
