

INTERMEDIATION

Meaning: Intermediation is the process by which intermediaries, such as brokers or agents, facilitate transactions and interactions between parties, particularly in financial markets.

1. Intermediation in financial markets can enhance liquidity and improve price discovery.
2. The role of intermediation is crucial in facilitating trade between buyers and sellers.
3. Effective intermediation often leads to reduced transaction costs for consumers and businesses alike.
4. In the digital age, technology has transformed traditional intermediation into more efficient platforms.
5. Regulatory changes can significantly impact the methods and effectiveness of intermediation in various industries.
