

INTERPENETRATION

Meaning: Interpenetration refers to the mutual penetration or intermingling of different elements, such as cultures or materials, resulting in a blending or interaction that enhances complexity or functionality.

1. The interpenetration of different cultures in urban areas leads to a rich tapestry of traditions and practices.
2. Scientists are studying the interpenetration of various materials at the molecular level to create more efficient batteries.
3. In the novel, the interpenetration of the protagonist's dreams and reality creates a surreal narrative that captivates readers.
4. The artist's work explores the interpenetration of light and shadow, creating a dynamic interplay that changes with perspective.
5. In ecology, the interpenetration of species in a habitat can significantly affect biodiversity and ecosystem health.
