

INTERPILASTER

Meaning: Interpilar refers to a decorative element or feature situated between two pilasters, often used in architecture to enhance aesthetic appeal.

1. The architect designed the building with elegant interpilares to enhance its classical aesthetic.
2. In the grand hall, each interpilar was intricately carved to reflect the artistic style of the period.
3. The restoration team meticulously preserved the original interpilares during the renovation process.
4. Light fell beautifully through the windows, casting shadows on the ornate interpilares that lined the walls.
5. Visitors admired the symmetry created by the interpilares, which added depth to the architectural design.
