

INTRADOS

Meaning: Intrados refers to the inner curve or surface of an arch or a vaulted structure, often considered in architectural design and decoration.

1. The architect meticulously studied the intrados of the arch to ensure structural integrity.
2. Artists often paint intricate designs on the intrados of ceilings to enhance aesthetic appeal.
3. During the restoration, the team carefully cleaned the intrados to reveal the original craftsmanship.
4. The intrados of the bridge was designed to provide both strength and visual elegance.
5. Understanding the intrados is crucial for engineers when calculating load distribution in arches.
