

INUNDATION

Meaning: Inundation refers to the overwhelming flood or overflow of water that submerges land or property, often as a result of heavy rainfall or rising water levels.

1. The city faced severe inundation after the heavy rainfall caused the river to overflow.
2. Emergency services were deployed to assist residents affected by the sudden inundation of their homes.
3. Inundation of the coastal areas has become a regular concern during hurricane season.
4. The scientists studied the effects of inundation on local ecosystems and wildlife habitats.
5. After the inundation, the community rallied together to rebuild and support those who lost everything.
