

INVALIDISM

Meaning: Invalidism is the condition or mindset of being perceived as invalid or lesser due to a disability, often leading to diminished self-esteem and social interactions.

1. Invalidism can profoundly affect a person's self-esteem and social interactions.
2. The concept of invalidism has been challenged by advocates for disability rights.
3. Many people misunderstand invalidism as a mere lack of ability rather than a condition.
4. Society's views on invalidism often lead to stigmatization of those with chronic illnesses.
5. Therapists play a crucial role in helping individuals overcome the feelings associated with invalidism.
