

IONIZE

Meaning: Ionize: to convert an atom or molecule into an ion by gaining or losing electrons, often resulting in the emission of energy or light.

1. The high-energy particles can ionize the surrounding gas, creating a visible glow.
2. In the laboratory, we often ionize samples to study their chemical composition.
3. Certain ultraviolet rays are strong enough to ionize atoms in the atmosphere.
4. The process of ionizing a gas involves removing electrons from its atoms.
5. Scientists are exploring ways to ionize water molecules for innovative energy solutions.
