

IRIDAL

Meaning: Iridal refers to a shimmering, iridescent quality or appearance, often characterized by changing colors or patterns, similar to those seen in certain natural objects like butterfly wings or eyes.

1. The iridal patterns in the butterfly's wings shimmered in the sunlight.
2. Her eyes held an iridal quality that changed with her mood.
3. The artist used iridal colors to create a captivating effect in the painting.
4. He admired the iridal sheen of the peacock's feathers as they displayed their beauty.
5. In the depths of the ocean, the iridal reflections danced on the surface like jewels.
