

ISOSULPHOCYANIC

Meaning: Isosulphocyanic refers to a class of chemical compounds related to isosulphocyanic acid, often utilized in chemical reactions and organic synthesis.

1. Isosulphocyanic acid is often used in various chemical reactions.
2. The research focused on the properties of isosulphocyanic compounds in organic synthesis.
3. Scientists are exploring the potential applications of isosulphocyanic derivatives in pharmaceuticals.
4. Isosulphocyanic salts can be formed through the reaction of thiocyanates and strong acids.
5. Understanding the behavior of isosulphocyanic molecules is crucial for advancing material science.
