

ITERABLE

Meaning: Iterable: An object in programming that can be traversed or iterated over, typically by using an `__iter__()` method.

1. An iterable is a fundamental concept in programming, allowing for efficient data manipulation.
2. In Python, any object that implements the `__iter__()` method can be considered iterable.
3. To traverse a list, you can use a loop that handles each iterable element one by one.
4. The ability to create custom iterable classes enhances the flexibility of your code.
5. Understanding how to work with iterables is essential for mastering advanced data structures.
