

JERBOA

Meaning: Jerboa: a small, nocturnal rodent with long hind legs, adapted for jumping and found in desert regions, known for its burrowing habits and foraging behavior.

1. The jerboa's long hind legs allow it to leap great distances across the desert sands.
2. In the cool of the evening, the jerboa emerges from its burrow to forage for seeds and insects.
3. With its large ears and big eyes, the jerboa is well adapted to its arid environment.
4. Watching a jerboa hop gracefully through the dunes is a fascinating sight for any wildlife enthusiast.
5. Despite its small size, the jerboa plays an important role in its ecosystem by aerating the soil.
