

JURISDICTION

Meaning: Jurisdiction is the official power or authority of a court to make legal decisions and judgments in a particular area or over specific cases.

1. The court asserted its jurisdiction over the case due to the defendant's residency in the area.
2. Jurisdiction can vary significantly from one state to another, impacting the legal process.
3. The international tribunal was established to address issues that transcend national jurisdiction.
4. In order for the lawsuit to proceed, the plaintiff needed to establish that the court had proper jurisdiction.
5. Disputes over jurisdiction can lead to complex legal challenges and delays in proceedings.
