

KALONG

Meaning: Kalong refers to a type of large fruit bat found in Southeast Asia, known for its impressive wingspan and habit of roosting in trees.

1. The kalong, known for its impressive wingspan, gracefully glided through the twilight sky.
2. In the dense forests of Southeast Asia, the kalong roosts high in the trees, often hanging upside down.
3. Locals believe that the kalong brings good luck, often incorporating its image into traditional art.
4. Scientists are studying the kalong's echolocation abilities to better understand bat communication.
5. As the sun set, the kalong emerged to forage for fruit, its silhouette striking against the fading light.
