

# KATYDID

*Meaning: A katydid is a type of large, green cricket-like insect known for its distinctive song and ability to camouflage among foliage.*

1. The katydid's rhythmic song filled the warm summer evening air.
2. Spotted while hiking, the bright green katydid blended seamlessly with the leaves.
3. As night fell, the chorus of katydids created a soothing backdrop for our campfire stories.
4. Many people mistake katydids for grasshoppers due to their similar appearance.
5. The delicate wings of the katydid shimmered in the dappled sunlight filtering through the trees.
