

# KERATITIS

*Meaning: Keratitis is the inflammation of the cornea, often leading to discomfort, redness, and sensitivity to light.*

1. Keratitis can cause significant discomfort and vision problems if left untreated.
2. Patients with keratitis often experience redness and sensitivity to light.
3. The doctor prescribed antibiotic eye drops to treat the bacterial keratitis.
4. Chronic keratitis may lead to scarring of the cornea and permanent vision loss.
5. Symptoms of keratitis can mimic those of other eye conditions, making diagnosis crucial.
