KEVEL

Meaning: Kevel (noun): A strong post or fixture on a boat or dock used for securing ropes or mooring lines.

1. The fisherman secured the boat with a sturdy kevel to prevent it from drifting away.

2. During the storm, the crew tightened the ropes around the kevel, ensuring everything remained in place.

3. Historically, a kevel was often used in shipyards to anchor vessels securely while repairs were made.

4. As the tide rose, the captain inspected the kevel to ensure it was holding firm against the surge.

5. Traditionally, sailors would gather around the kevel to share stories of their voyages and adventures.
