

# LANDER

*Meaning: Lander: a spacecraft designed to descend and land on a celestial body, such as a planet or moon, to conduct scientific exploration.*

1. The spacecraft's lander gently touched down on the surface of Mars, sending a plume of red dust into the air.
2. Engineers celebrated as the lander deployed its solar panels, ready to begin its mission.
3. The lunar lander was designed to withstand extreme temperatures during its descent to the moon.
4. Scientists eagerly awaited the data from the lander, hoping to discover signs of past life on the planet.
5. After a successful landing, the lander began transmitting images of the alien landscape back to Earth.
