

LANDFLOOD

Meaning: Landflood: a sudden overflow of water onto land, typically resulting from heavy rainfall, causing damage to property and agriculture.

1. The recent landflood caused significant damage to the agricultural fields along the riverbank.
2. After the heavy rains, the once-dry valley transformed into a landflood, sweeping away homes and livestock.
3. Authorities issued warnings to residents in low-lying areas about the potential for a devastating landflood.
4. Emergency crews worked tirelessly to rescue families trapped by the sudden landflood that engulfed their village.
5. Scientists are studying historical data to better predict the occurrence of landfloods in vulnerable regions.
