

LARVE

Meaning: Larve refers to the immature, often worm-like stage of certain insects, such as butterflies, that emerges from an egg and undergoes development before metamorphosis.

1. The larve of the butterfly emerged from its egg, ready to begin its transformation.
2. Entomologists study the larve of various insects to understand their development and behavior.
3. As the larve feasted on leaves, it grew rapidly, preparing for its metamorphosis.
4. The garden was filled with the sound of chirping, as the larve turned into pupae in the soil.
5. It was fascinating to observe how the larve adapted to its environment in such a short time.
