LATERIFOLIOUS

Meaning: LATERIFOLIOUS refers to a plant characteristic of having leaves arranged laterally or on the sides, often as an adaptation to specific environmental conditions such as limited sunlight.

1. The laterifolious plant species thrived in the humid understory of the rainforest.

2. Researchers noted the distinct laterifolious growth pattern as a key adaptation to limited sunlight.

3. In botanical studies, laterifolious leaves often indicate a unique evolutionary response to their environment.

4. The laterifolious arrangement of foliage allowed the tree to maximize photosynthesis in its shaded habitat.

5. Gardeners appreciate laterifolious varieties for their striking appearance and efficient space utilization.
