

LEEBOARD

Meaning: A leeboard is a lateral fin or board attached to the hull of a sailboat to provide lateral resistance and stability against the wind.

1. The leeboard helped stabilize the sailboat as it navigated through the choppy waters.
2. In traditional Dutch barges, a leeboard is essential for maintaining course against the wind.
3. The captain adjusted the leeboard to improve the vessel's performance during the race.
4. Sailors often find that a well-angled leeboard can significantly increase their speed.
5. For optimal handling, it's crucial to inspect the leeboard before each journey.
