

LIGHT-SHIP

Meaning: A light-ship is a vessel equipped with a light and often other navigational aids, anchored in a specific location to guide maritime traffic.

1. The light-ship anchored offshore served as a crucial navigational aid for passing vessels.
2. During a storm, the light-ship's beacon pierced through the thick fog, guiding boats safely to shore.
3. Historically, light-ships were often manned by crews who endured harsh conditions for the sake of maritime safety.
4. In modern times, many light-ships have been replaced by fixed lighthouses, but their legacy remains significant.
5. The advent of technology has transformed how we perceive light-ships, yet their historical importance in navigation endures.
