

LIVOR

Meaning: Livor refers to the pooling of blood in the lower parts of a body after death, resulting in a purplish discoloration of the skin known as livor mortis.

1. The pathologist noted the presence of livor mortis during the examination of the body.
2. After several hours in the cold, livor began to set in, indicating the time of death.
3. In forensic science, livor is crucial for estimating the postmortem interval.
4. The distinct purplish discoloration of the skin was a clear sign of livor.
5. Understanding livor can help detectives piece together the circumstances surrounding a death.
