

LOCK-WEIR

Meaning: A lock-weir is a structure on a river that combines a lock for boat passage with a weir to control water levels and flow.

1. The lock-weir system efficiently manages the river's water levels.
2. Fishermen often gather near the lock-weir, hoping to catch migrating fish.
3. Engineers designed the lock-weir to accommodate both boats and aquatic life.
4. During heavy rains, the lock-weir helps prevent flooding in the surrounding areas.
5. Visitors can enjoy scenic walks along the pathways adjacent to the lock-weir.
