

LOCUSTING

Meaning: Locusting refers to the process or phenomenon of swarming behavior in locusts that leads to large groups of these insects consuming vast amounts of vegetation, particularly crops.

1. The phenomenon of locusting can devastate entire crop fields in a matter of days.
2. Farmers are often left helpless in the face of locusting swarms that darken the sky.
3. Locusting is not just a natural occurrence; it can also be exacerbated by climate change.
4. The documentary highlighted the devastating effects of locusting on local communities and economies.
5. Research into locusting patterns might help predict and mitigate future agricultural disasters.
