

LUDIFICATION

Meaning: Ludification is the process of incorporating game-like elements or playful approaches into various settings, such as education or the workplace, to enhance engagement and motivation.

1. Ludification in education can enhance student engagement and foster a love for learning.
2. The ludification of the workplace has led to more innovative team dynamics and increased productivity.
3. As video games continue to evolve, the concept of ludification becomes increasingly relevant in understanding player experiences.
4. Critics argue that the ludification of serious topics can trivialize important issues in society.
5. Incorporating elements of ludification into therapy can make the process more enjoyable for patients.
