

LUNATION

Meaning: Lunation is the period of time it takes for the moon to complete one full cycle of its phases, approximately 29.5 days.

1. A lunation lasts approximately 29.5 days, marking the cycle of the moon's phases.
2. Astronomers track each lunation to study its impact on tides and other natural phenomena.
3. The full moon occurs at the midpoint of each lunation, lighting up the night sky beautifully.
4. In many cultures, a lunation is celebrated as a time of renewal and reflection.
5. The concept of lunation has been central to various calendars throughout history, influencing agricultural practices.
