

LUNET

Meaning: LUNET (noun): A crescent-shaped or arched area, often referring to a section of a landscape or sky that is illuminated or highlighted, particularly during sunset or in artistic representations.

1. The artist captured the delicate beauty of the lunet in her latest painting.
2. As the sun set, the lunet above the horizon created a stunning silhouette against the sky.
3. In ancient architecture, a lunet often served as a decorative element in vaulted ceilings.
4. The museum showcased a rare collection of lunets that highlighted various historical periods.
5. A skilled craftsman meticulously carved intricate designs into the lunet above the entrance.
