

# MACHICOLATED

*Meaning: Machicolated: constructed with overhanging sections that allow defenders to drop projectiles or substances onto attackers below, typically seen in fortified structures like castles.*

1. The ancient castle was impressively machicolated, with stone overhangs designed to protect the defenders above.
2. During the siege, the soldiers utilized the machicolated parapets to pour boiling oil on the invaders below.
3. Architectural enthusiasts marveled at the machicolated features that adorned the fortified walls.
4. In medieval times, machicolated battlements were a common feature of castles, serving both aesthetic and defensive purposes.
5. The preservation of the machicolated towers has made this fortress a popular site for history buffs and tourists alike.
