

# MACRO

*Meaning: Macro refers to a large-scale or overall perspective, often used in programming to denote a set of instructions that automate tasks, or in economics to describe broad trends and patterns in a system.*

1. A macro in programming can automate repetitive tasks, saving time and effort.
2. The economic analyst presented a macro view of the market trends over the past decade.
3. Using a macro lens, the photographer captured stunning details of the tiny flowers.
4. The company implemented a macro strategy to expand its market presence globally.
5. In the world of fitness, a macro breakdown of nutrients helps individuals tailor their diets.
