

MACROURA

Meaning: Macroura refers to a group of deep-sea crustaceans, commonly known as shrimp or prawn, characterized by their elongated bodies and adaptations for life in deep ocean habitats.

1. The macroura species is known for its unique adaptations to deep-sea environments.
2. Researchers discovered a rare macroura specimen while exploring the ocean floor.
3. The macroura's bioluminescent features were a significant focus of the marine biology conference.
4. In studying macroura, scientists aim to understand the ecological impact of deep-sea organisms.
5. The delicate structure of the macroura's exoskeleton makes it particularly vulnerable to environmental changes.
