

MALEBRANCHISM

Meaning: Malebrancheism is a philosophical doctrine that asserts the necessity of divine intervention in the acquisition of human knowledge, often associated with the ideas of Nicolas Malebranche.

1. Malebrancheism emphasizes the role of divine intervention in human knowledge.
2. The philosophical debates surrounding Malebrancheism often challenge Cartesian dualism.
3. In studying Malebrancheism, one encounters intricate discussions about the nature of perception.
4. Critics of Malebrancheism argue that it undermines human agency by attributing too much to God's will.
5. Malebrancheism invites a reevaluation of the relationship between faith and reason in the pursuit of truth.
