

MALLARD

Meaning: Mallard: a common species of wild duck (Anas platyrhynchos) known for the male's distinctive glossy green head and often found in various habitats, including urban parks and rural ponds.

1. The mallard is a common sight in both urban parks and rural ponds.
2. During the spring, the male mallard's vibrant green head becomes a striking feature of the landscape.
3. I watched a group of mallards glide gracefully across the calm surface of the lake.
4. The female mallard, with her mottled brown feathers, is often overlooked despite her beauty.
5. Mallards are known for their loud quacking, which can be heard echoing through wetlands.
