

MANCHINEEL

Meaning: Manchineel is a tropical tree (Hippomane mancinella) known for its highly toxic fruit and sap, which can cause severe skin irritation and poisoning.

1. The manchineel tree, known for its toxic properties, is often referred to as the "most dangerous tree in the world."
2. While the fruit of the manchineel may look tempting, it is extremely poisonous and can cause severe health issues.
3. Locals are often warned to avoid standing under a manchineel during rain, as the water drips can lead to painful skin reactions.
4. In tropical regions, the manchineel is often marked with warning signs to protect unsuspecting travelers from its harmful effects.
5. Despite its dangers, the manchineel tree plays a crucial role in its ecosystem, providing habitat for various wildlife.
