

MARROWLESS

Meaning: Marrowless: lacking bone marrow, resulting in reduced nutritional value or appeal.

1. The bone was found to be marrowless, resulting in a less nutritious meal for the scavengers.
2. Despite its size, the marrowless structure of the fish made it less appealing to the diners.
3. In a world where resources are scarce, finding marrowless bones can be a sign of environmental degradation.
4. The researchers noted that marrowless specimens were more common in species suffering from habitat loss.
5. Marrowless plants in the area struggled to survive the harsh winter conditions, showcasing their vulnerability.
