

MASSICOT

Meaning: Massicot is a yellow pigment made from lead oxide, historically valued for its opacity and brightness in oil paints.

1. Massicot is often used as a pigment in oil paints due to its rich yellow color.
2. Artisans in historical times prized massicot for its ability to provide a bright, opaque finish.
3. The use of massicot in ceramics can enhance both the aesthetic and durability of the glaze.
4. In restoration projects, massicot plays a crucial role in replicating the original hues of antique artworks.
5. Despite its beauty, massicot must be handled with care due to its lead content.
