

MEIOCENE

Meaning: Miocene: relating to the geological epoch that lasted from about 23 to 5 million years ago, characterized by the development and diversification of mammals and the climate changes that influenced vegetation.

1. The Miocene epoch was a significant period in Earth's history, marked by the evolution of many modern mammal species.
2. Fossils from the Miocene have provided valuable insights into the climate and vegetation of that era.
3. Researchers discovered a new species of ancient whale that lived during the late Miocene in the coastal sediments.
4. The Miocene is often characterized by the expansion of grasslands, which had a profound impact on herbivore evolution.
5. Paleontologists are studying Miocene deposits to understand the changes in biodiversity that occurred due to climate shifts.
